

Thank you for your interest in working with the Pennsylvania Office of Attorney General Law Enforcement Treatment Initiative. Overdose is now the number one accidental killer in the Commonwealth. This epidemic is our greatest public safety challenge and my top priority as the chief law enforcement officer in Pennsylvania.

By participating in this initiative, you will not only help save lives, but demonstrate clearly to your communities that law enforcement can be a force for good in more ways than one.

I look forward to partnering with your agency to help people who seek help find the treatment they need so that they can begin their road to recovery.

*Michelle A. Henry
Attorney General*

How it works:

- *The Office of Attorney General partners with District Attorneys, local police departments and Stakeholders to help open the door to people seeking treatment resources.*
- *When people come in for help, this program helps connect people to resources as well as promises no threat of arrest or prosecution for minor drug offenses.*
- *After conducting a brief intake, law enforcement personnel will help connect individuals immediately to treatment resources.*
- *LETI is a law enforcement led policy through the county district attorney's office.*
- *Anyone can be a referral into treatment with a DA led LETI policy.*

How does the Office of Attorney General help?

- *We will help establish connections and partnerships with your drug and alcohol commission.*
- *An Agent from our office will meet with you to write your policy. Training on your policy is provided to help the program get up and running quickly.*
- *We will assist with promoting your LETI policy in your community and on the AG website. This will ensure that those who need it will know that it is there.*

What would your department need to do?

- *Maintain relationships with your drug and alcohol commission once they are established.*
- *Consider people who are suffering for substance use disorder for a LETI referral.*
- *Help track statistics so that the Office of Attorney General can evaluate and improve the program*
